150W Dual outlet Slim line Inverter

Be truly mobile and always fully prepared with the Targus Slim Line Inverter, converting DC power from your car cigarette lighter into AC to power to charge your notebooks and mobile accessories, this inverter makes the most of your precious time on the move.

Instant power on the move is crucial in today's fast moving business environment. Designed to work within cars and airplanes (where applicable), the Targus Power inverter will convert the DC power produced by these sources into AC power which can be used to power and charge your laptop. The dual outlet function enables you to charge one or several devices at a time, while the USB port allows further simultaneous charging or powering of low wattage devices like a mobile phone or PDA. Compact, slim line and discreet, the inverter solution from Targus will ensure your always truly mobile..

Model # APV07EU

KEY FEATURES

- Productive -Using a standard cigarette lighter or in-flight seat power source, power one or several mobile devices simultaneously up to a combined 150W
- Practical and safe - in -built Safety features such as surge protector and autoshutt off prevent damage or draining of your battery.
- Sleek design - The slim line, compact light-weight design helps make the most of limited space within car and plane environments
- Dual charging - The dual outlet function enables you to charge up to two AC devices at a time (as long as the total power consumption does not exceed 120W)
- Peripheral charging - USB port allows further simultaneous charging or powering of a low wattage device like a mobile phone or PDA.
